## EDUCATION

### Vellore Institute of Technology - AP University

2022 – 2026

*B.Tech in Computer Science and Engineering, GPA: 8.21 (through 7th semester)*

### R.P.S Senior Secondary School, Mahendergarh

Completed: 2021

*Class X: 94.6%    Class XII (PCM): 94.6%*

## EXPERIENCE

### Ekaa Pvt. Ltd.

Mar 2026 – May 2026

*Full Stack Developer Intern*

- Sole engineer on a production MERN stack platform for **40,000 users**; owned full SDLC from requirement gathering and UI/UX design through development, testing, deployment, and maintenance on Hostinger
- Architected RBAC across **4 user types** with JWT auth, httpOnly cookies, refresh token rotation, and protected routes
- Built RESTful APIs with Node.js and Express.js covering validation, error handling, rate limiting, and logging; designed MongoDB schemas, migrations, seed scripts, and multi-status workflow engines with dynamic state transitions
- Engineered a storage abstraction layer over Cloudinary and VPS with signed URLs for secure file upload and retrieval
- Built complete frontend with React, Vite, and Tailwind CSS via iterative VP-level design reviews; delivered custom UI effects, responsive layouts, loading skeletons, toast notifications, and pagination
- Achieved full backend test coverage with Jest and Playwright; leveraged Claude Code and AI tooling to deliver a multi-month scope within a **2-month** timeline

## PROJECTS

### VIT-AP Attendance Planner | *React 19, Firebase, Vercel, Tailwind CSS, Node.js*

[github](#) | [live](#)

- Built and deployed a full-stack attendance forecasting app for **5,000+ students** on Vercel with React 19, Firebase Auth, and Firestore; reached **1,000+ visits** and **40+ daily active users** within 1.5 months
- Integrated a hybrid ML risk engine using a CART decision-tree classifier and weighted formula scoring with a "worst label wins" ensemble across attendance %, skip buffer, recovery classes, and trend bucket
- Integrated a statistical forecast model using linear regression with EWMA smoothing ( $\alpha=0.4$ ) and 95% confidence intervals over attendance snapshots
- Designed a shared analytics engine across React UI and Vercel serverless functions; built automated email and Telegram notifications via Vercel Cron with per-user throttling and Firebase Admin token verification

### Healthcare Symptom Checker | *React, Node.js, Express.js, MongoDB, Grok AI*

[github](#) | [live](#)

- Built a full-stack AI-powered symptom checker using React, Node.js, Express.js, MongoDB, and Grok AI for intelligent symptom analysis and medical recommendations
- Implemented RESTful APIs with Helmet, CORS, rate limiting, and Winston logging; designed Mongoose schemas for query history and condition data, and deployed on Vercel and Render with automated health checks

## TECHNICAL SKILLS

**Languages:** Java, JavaScript (ES6+), SQL

**Frontend:** React.js, Vite, Tailwind CSS, HTML5, CSS3

**Backend:** Node.js, Express.js, Mongoose, RESTful APIs, JWT, Firebase Admin SDK

**Databases:** MongoDB (Atlas), Firestore, PostgreSQL

**Testing:** Jest, Playwright

**DevOps & Tools:** Git, GitHub, Postman, Vercel, Render, Hostinger VPS, Cloudinary

**CS Fundamentals:** Data Structures & Algorithms, OOP, DBMS, Operating Systems, SDLC

**AI & Tooling:** Generative AI, LLM API Integration, Prompt Engineering, Claude Code

## AWARDS, CERTIFICATIONS & TRAINING

---

- Runner-up, V-Launch Pad 2024 Business Plan Competition, VIT-AP University
- Microsoft AI-900 Certified (Azure AI Fundamentals), 2024
- Completed MongoDB Database Admin Path, 2025
- Advanced DSA training (GeeksforGeeks); 180+ LeetCode problems solved, 2025
- Event Manager, Anchoring Club, VIT-AP; organised and managed multiple technical and cultural events
